

AOD Elite Web Entry

The Elite Web Entry module is a web portal allowing information to flow from a web site to the AnswersElite software. The Alerts and Messaging module is required for full functionality of the AOD Elite Web Entry module.

Current functionality includes:

- Ability of interested applicants to complete an online application and attach documents which will then be sent to the Human Resources module
- User defined data fields to be included in the online form and transferred to Human Resources are defined in the Human Resource module parameters
- Information such as availability to work, positions applying for, employment history, criminal record, education, licenses and certifications, skills, references, are included.
- Additionally, up to 15 user defined questions can be included on Web Entry form.
- Ability to define up to 8 different statements, for example, require an “I accept these terms and conditions” box to be checked before submission.
- Ability to send confirmation e-mail to applicant and Post submission message.

Integrates with

Alerts & Messaging & Human Resources

Key Features

Ability to send confirmation e-mail to applicant and Post submission message.
