

Activity & Event Tracking

The Activity and Event Tracking module allows you to track the amount of time that residents (or non-residents) spend on activities. This can be especially beneficial for tracking the hours spent on volunteer activities and/or for clinical documentation purposes. Another useful purpose would be to help document the volunteer activities necessary to maintain not-for-profit status.

- On line Registration for events and activities with the ability to set capacity limits, establish waiting lists and print rosters.
- Quality Indicator Codes track level of participation.
- Ability to track sponsorship participation and levels.
- Outsider Participants Tracking for events or activities by parties other than residents or non residents such as renting out rooms for training or parties.
- Integration with Resident Billing and 1st and 3rd Party Billing minimizes data entry in recording chargeable activities and events.

Reports

- Activity Summary
- Event Roster
- Resident and Non Resident Activity Report – Detail and Summary
- Resident and Non Resident Activity Labels
- Waiting Lists

Integrates with

Admissions & Census, Resident Billing, 1st and 3rd Party Billing, Donor Development, Accounts Payable and General Ledger.

Key Features

All tables have the ability to be modified to meet the specific needs of your facility.

User defined query and reporting range and sort options.
