

Answers On Demand
Integrated Healthcare Solutions

Assisted Living

The Answers Assisted Living system is comprehensive; handling service plans and custom assessments at each facility. It also integrates into the Medical Records area for a complete view of your Residents and flows to billing for a seamless and integrated record.

Admissions & Management:

- Works hand-in-hand with the Admissions & Census module to provide daily tracking of Facility, Admission Status, Payor Types and Resident Profiles.
- One profile is created per Resident and many Admission records can be attached as the Resident experiences campus movement. Pre-admissions are allowed and the system integrates to the Marketing module for your Marketing staff to manage potentially interested Residents.
- Have all of the information about the Resident at your fingertips, including, demographics, medical, family contacts, insurance, HIPAA details and much more including a user-defined area to store any other items you may need.

Assessments & Service Plans:

- Assessments are user-defined and can score responses in order to determine levels of care. This information automatically integrates to Admissions & Census as well as Billing without the need to re-enter information.
- Many reasons for assessments trigger business rules that update the level of care, including,

Key Features

- Integrated to your AOD Billing System, Clinicals and Financials
