

Home Health OASIS

The Home Health OASIS (Outcome and Assessment Information Set) module assists in Medicare compliance for Home Health Agencies.

OASIS data entry is part of a Smart Chart feature that enables the end-user to easily access the assessment fields for a given client in order to complete the Assessments.

Other features include:

- Demographic information is automatically transferred to the Home Health Assessment from the client profile, which helps to minimize duplication of efforts, reducing the likelihood of errors.
- Provides a Field-by-Field check for completion of the OASIS Assessment as the data is entered.
- Provides a visual diagram for tracking skin lesions.
- Provides for a quick and easy compilation of data entered into the assessment for HHRG Grouper analysis.
- OASIS Export Manager provides a user-friendly format for tracking completed assessments and selecting OASIS compliant assessments for export.
- Information transfers to the Plan of Care (485) from the Home Health Assessment, which helps to minimize duplication of efforts, reducing the likelihood of errors.
- Reduces paperwork with electronic data entry Point of Service and Hand Held Units. Assessments can be entered and linked to billing.

Reports

- OASIS Export Manager
- OASIS Status Report
- OASIS Inconsistency Report
- HHRG Grouper Analysis

Integrates with

Admissions and Census and Home Health Services.

Key Features

Reduces the amount of time required to address all the paperwork issues of an individual client and allows the clinician more time on resident care.

Can be modified to meet the individual needs of the agency.
